

Hess Named to Dow Jones Sustainability Index (DJSI) North America for Eighth Consecutive Year

September 11, 2017

NEW YORK--(BUSINESS WIRE)--Sep. 11, 2017-- Hess has earned a place on the prestigious Dow Jones Sustainability Index (DJSI) North America for the eighth consecutive year. The [index](#), which recognizes public companies for outstanding performance across economic, environmental and social factors, is used as a reference by shareholders who consider sustainability when making investment decisions. Only the most sustainable companies in each industry are considered each year for index membership.

Hess is one of four U.S. oil and gas producers in the Energy industry group listed on the North America Index.

"Being recognized by the Dow Jones Sustainability Index for the eighth straight year is an honor and demonstrates our company's commitment to sustainability," said Alex Sagebien, VP, Environment, Health and Safety, Hess Corporation.

The DJSI, introduced in 1999, is produced by Dow Jones in collaboration with RobecoSAM, a Swiss investment company founded on the belief that integrating Environmental, Social and Governance (ESG) factors into traditional financial analysis can generate long-term value. The company has compiled one of the world's most comprehensive databases of financially material sustainability information.

Hess' Corporate Sustainability Report describes the company's sustainability strategy and environmental, social and governance programs. The 2016 report is available at: www.hess.com/sustainability/sustainability-reports.

Hess Corporation is a leading global independent energy company engaged in the exploration and production of crude oil and natural gas. More information on Hess Corporation is available at www.hess.com.
