(a) Adjusted Earnings is defined as reported net income excluding discontinued operations, cumulative effect of changes in accounting principles, and items identified as affecting comparability of earnings between periods. We believe that investors' understanding of our performance is enhanced by disclosing this measure. This measure is not, and should not be viewed as, a substitute for U.S. GAAP net income.

(a) Adjusted Earnings is defined as reported net income excluding discontinued operations, cumulative effect of changes in accounting principles, and items identified as affecting comparability of earnings between periods. We believe that investors' understanding of our performance is enhanced by disclosing this measure. This measure is not, and should not be viewed as, a substitute for U.S. GAAP net income.

(b) Reflects the impact of the retrospective adoption of a new accounting pronouncement related to refinery turnarounds in 2007.

(c) See explanation of items affecting comparability for treatment of the impact of the supplementary tax on petroleum operations in the United Kingdom during 2006.
